

SAFETY INSTRUCTIONS

Please review these safety tips before using your Halyard Mask

1. The **primary function of a facemask** is to protect others from you transmitting disease to them, knowingly or unknowingly.
2. The **outer surface of the mask can be contaminated easily**. Covid-19 can survive on the outside of a surgical mask for more than 7 days. Disinfect (with alcohol sanitizer or soap and water) your hands every time you touch any facemask and every time before and after wearing and taking off your mask.
3. Wearing a mask may not protect you from COVID-19 unless you also follow other infection control measures like **physical distancing** (stay >2m from others), **frequent handwashing** (>20 seconds of soap and water), and **avoidance of cross-contamination** (avoid touching your face)

4. **If reusing any mask, please sterilize after each use.** For best performance, use **dry heat at 70°C for 30min (eg. oven, dehydrator)** to sterilize the mask against the COVID-19 virus and bacteria.

If your mask is **dirty, soiled or smells**, gently **scrub and soak it in soapy water (use soap or a mild detergent) for 15min**, then rinse off with water and leave to air dry. Alternatively, you can place the mask in a **laundry bag to launder** the mask in the **washer and dryer with the high heat** option.

5. **Do not share your mask with others.** There are other diseases that can be transmitted other than COVID-19.
